

MUHAMMAD UMER

Full-Stack / MERN Developer

codebyumer.dev@gmail.com | +92-316-1395147 | Karachi, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack MERN/SaaS developer and freelancer specializing in ecommerce solutions, building production-grade platforms with React/Next.js, TypeScript, and Supabase for businesses in Pakistan. Experienced designing and shipping complex, multi-role systems end to end — from database schema and Row-Level Security policies through UI implementation and deployment — including platforms with 200+ features, 30+ database tables, and 30+ serverless Edge Functions. Comfortable across the full stack with Node.js, Express.js, NestJS, GraphQL, MongoDB, and PostgreSQL, and experienced integrating authentication, payment, and third-party services. Uses structured, audit-driven AI-assisted development workflows to deliver reliable code efficiently.

CORE SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, React 19, Next.js (App Router), Redux Toolkit, TanStack Query, Tailwind CSS, MUI, shadcn/ui, Framer Motion, GSAP

Backend: Node.js, Express.js, NestJS, GraphQL, REST APIs, Serverless/Edge Functions

Databases: MongoDB, PostgreSQL, Supabase, Row-Level Security (RLS)

Auth & Payments: Supabase Auth, Clerk, OTP verification flows, JazzCash/EasyPaisa integration, server-authoritative pricing

Tools & Platforms: Git, GitHub, AWS, Vercel, Cloudinary, VS Code

AI-Assisted Development: OpenCode, Antigravity, structured PRD/TRD-driven workflows

EXPERIENCE

Freelance Full-Stack Developer — Self-Employed

2025 – Present

Karachi, Pakistan

- Design and build production-grade ecommerce and B2B SaaS platforms for local businesses using React/Next.js, TypeScript, and Supabase — covering database schema, RLS policies, UI implementation, and deployment.
- Built Luxee Store, an enterprise-grade ecommerce platform (React 19, TypeScript, Supabase, React Query, Tailwind, shadcn/ui) with 237+ features, 8 user roles, 30+ RLS-protected database tables, and 35+ Edge Functions; used as the live storefront for an active clothing business.
- Built KarobariHub, a B2B pharmaceutical wholesale ordering platform connecting suppliers and retailers, featuring subdomain-based per-supplier storefronts, cross-subdomain authentication, and a Shopify-style public marketing site (Next.js, Redux Toolkit, TanStack Query, Supabase).
- Built VAULTA, a luxury watch ecommerce platform with a full Supabase backend (schema, Edge Functions, RLS, seed data), Clerk authentication, server-authoritative pricing, and a complete admin dashboard.
- Delivered a Next.js design portfolio site for a studio client, implementing a custom design system, GSAP/Framer Motion animation, and a reusable, type-based section-renderer architecture.
- Run structured, audit-driven development cycles (PRD → phased implementation → audit → fix) using AI coding agents (OpenCode, Antigravity) to ship and debug complex features including authentication, checkout, and admin systems.

Frontend Developer Intern — Softgrid Solutions

Jun 2026 – Aug 2026

Remote

EDUCATION

Modern Web & Mobile App Development — Saylani Mass IT Training (SMIT) Sep 2025 – Sep 2026

Diploma — Karachi, Pakistan — Certified
